

Mubashir Irfan

Senior Frontend-Focused Engineer

+966502216971 | mubashir.irfan37@gmail.com | [LinkedIn](#)

Riyadh, Saudi Arabia

Summary

Senior Frontend Engineer with more than 6 years of experience developing scalable, performant web applications. Experienced in building AI SaaS products from scratch, developing business-critical web app workflows, building a culture of engineering excellence and driving processes across multiple teams. Driven by empathy in UI/UX for end users and peer contributors. Open to both Individual Contributor and Lead/Managerial roles.

Work History

Senior Frontend Engineer

WakeCap

Riyadh, Saudi Arabia

May 205 - Present

- Leading frontend development for AI-powered Web App for project site safety and observability
- Brainstorming and developing next-gen **AI-powered** web features
- Developing **React micro-frontend** applications using **single-spa**
- Implementing UI with **ShadCN** and **TailwindCSS**
- Integrating and managing states of APIs with **React Query**
- Managing release cycles and deployments
- Logging analytics with **Mixpanel**

Senior Engineer (Frontend)

LocAI

Abu Dhabi, UAE

Apr 2024 - May 2025

At LocAI, I was hired to build an AI-powered EdTech SaaS from scratch. I wrote the application's bootstrap code, designed and implemented the auth architecture, access management, backend integration, telemetry and analytics from scratch. In parallel, I also contributed to developing a healthy culture and collaboration within the Engineering team, and presented in company-wide Frontend Chapter meetings.

- Developed Iqraa Dashboard with **NextJS**, **TypeScript**, **React**
- Implemented UI with **Headless UI**, **Mantine**, and **TailwindCSS**
- Implemented State Management with **Redux**
- Developed custom **Authentication** and **Authorization** architecture using **React Query** and **Redux** from scratch
- Developed custom API integration layer with **React Query**
- Integrated custom auth architecture with a centralized **Identity** and **Access Management Platform**
- Implemented Engagement Analytics Pipeline with **Rudderstack**, **Mixpanel**, **Google Analytics**
- Implemented multi-language support and **Internationalization** for RTL Languages
- Wrote **unit tests** in **Jest** to ensure use case coverage

Senior Software Engineer

Careem

Dubai, UAE (Remote)

Aug 2023 - Apr 2024

At Careem, I was hired to build the Careem Bikes and EV Delivery admin dashboard from scratch. I wrote the repo from scratch, designed and developed the Backend Integration Architecture, wrote integration with Careem Platform, and implemented service monitoring with Prometheus and Grafana.

- Developed Careem Bikes Admin Dashboard with **NextJS** and **TypeScript**
- Implemented UI styles with **TailwindCSS**
- Wrote **unit tests** in **Jest** to ensure use case coverage
- Wrote API Integration Layer with **React-Query**

- Implemented State Management with **Context**
- Implemented Observability and Monitoring with **Grafana** and **Prometheus/PromQL**
- Implemented Arabic Notifications for Careem Bikes Madina Launch
- Conducted technical interviews for hiring Frontend Engineers

Software Engineer II

[Rayn](#)

Oct 2022 - Jul 2023

Islamabad, Pakistan

- Wrote **HTML**, **CSS**, and **TypeScript** in **React**, participating in **peer code reviews** and **pair programming**
- Developed **automation tools** to reduce the manual workload of GIS operations teams
- Developed an automated deck generator saving company approximately 100 hours per month
- Conducted **technical interviews** for hiring potential candidates, **mentoring** and **onboarding** new hires
- Designed collaboration and development **processes** for multiple teams to streamline development
- Drove process-enforcing for 3 teams to increase productivity by 40% to 50% and reduce backlog
- Led development on a setup portal to reduce 40% of setup time for the ops team

Software Engineer II

[Motive](#)

Jul 2020 - Oct 2022

Islamabad, Pakistan

- Wrote **TypeScript**, and **RxJS** in **Angular 2+**, **Ant Design**, and **Unit Tests** for an **enterprise** application
- Served as frontend **on-call engineer** every quarter for monitoring of production, **hot-fixing** 2 production **escalations**, authoring 1 blameless post-mortem report
- Implement **instrumentation solutions** for analyzing 100% of possible user interactions with a business-critical workflow using **Pendo** and **Mixpanel**
- Implemented an internal tool for training 100s of data annotators
- Led conversion of a major **legacy workflow** into a **mobile-friendly responsive** implementation
- Conducted technical interviews, knowledge-sharing sessions and authored technical design documents

Software Engineer II

[Xgrid](#)

Jun 2019 - Jul 2020

Islamabad, Pakistan

- Developed **Angular 2+** powered dashboard with **Material UI**, **RxJS**, **WebSockets**, **NgRx**

Skills

Core Frontend:	HTML, CSS, JavaScript / TypeScript
Frameworks/Libraries/Systems:	Angular 2+, React, NextJS, Ant Design, Tailwind CSS
State Management:	NgRx / Redux / Context API
Unit Tests:	Jest, Jasmine
Reactive Programming:	RxJS
Monitoring & Observability:	TrackJS, Grafana, Prometheus
Usage Analytics:	RudderStack, Google Analytics, Pendo, Mixpanel

Education

Bachelor of Computer Systems Engineering (CGPA 3.81/4.0.0)
NUST, Islamabad, Pakistan

September 2015 - June 2019
